Australian Animal Coloring Pages

A simple plan, answer key and trustworthy reading.

Suggested level: Ages 3-5 | Animal vocabulary and noticing shapes

GET READY

- Choose an animal and say its name together.
- Find the body feature in the prompt.
- Color freely and tell someone what you noticed.

SHEET-BY-SHEET NOTES

01 / Kangaroo: Open-ended coloring. Notice the long tail and powerful hind legs.

02 / Koala: Open-ended coloring. The koala is a marsupial, not a bear.

03 / Bare-nosed Wombat: Open-ended coloring. Wombats are burrowing marsupials.

04 / Platypus: Open-ended coloring. The platypus is an egg-laying mammal.

05 / Short-beaked Echidna: Open-ended coloring. An echidna is an egg-laying mammal with spines.

06 / Emu: Open-ended coloring. The emu is a flightless bird.

TEACHING NOTES

- Find Australia on a map. These animals occur in different parts of the country and do not all share one habitat.
- Kangaroos, koalas, and wombats are marsupials. Platypuses and echidnas are egg-laying mammals. The emu is a bird.
- Koalas are not bears. Let children choose colors; use species photographs for a natural-color extension.
