

Egg

Color the frog eggs. Tell an adult what hatches next.

EGG

Name: _____

Frog Life Cycle Coloring Pages / 01

Tadpole

Color the tadpole. Point to the tail it uses to swim.

TADPOLE

Name: _____

Frog Life Cycle Coloring Pages / 02

Froglet

Color the froglet. Find its legs and its little tail.

FROGLET

Name: _____

Frog Life Cycle Coloring Pages / 03

Adult Frog

Color the adult frog. Compare it with the froglet.

ADULT FROG

Name: _____

Frog Life Cycle Coloring Pages / 04

The Whole Life Cycle

Start at the egg. Follow the arrows and say each stage.

1. Egg

2. Tadpole

4. Adult Frog

3. Froglet

Name: _____

Frog Life Cycle Coloring Pages / 05

Put the Stages in Order

Write 1 to 4 in the boxes. Start with the egg.

Adult Frog

Egg

Froglet

Tadpole

Write 1, 2, 3 and 4 in the boxes.

Name: _____

Frog Life Cycle Coloring Pages / 06

Frog Life Cycle Coloring Pages

A simple plan, answer key and trustworthy reading.

Suggested level: Ages 3-5 with an adult | Naming life stages and putting events in order

GET READY

- Read the stage names aloud together.
- Color a stage and talk about what changes.
- Use the cycle page first, then try the ordering page.

SHEET-BY-SHEET NOTES

- 01 / Egg: Tadpoles hatch from the eggs in this typical pond-frog cycle.
- 02 / Tadpole: The tadpole grows legs as it changes toward a froglet.
- 03 / Froglet: The froglet has legs and a remaining tail. The tail is gradually absorbed.
- 04 / Adult Frog: The adult frog has four legs and no tail.
- 05 / The Whole Life Cycle: Egg -> Tadpole -> Froglet -> Adult Frog. The cycle starts again with eggs.
- 06 / Put the Stages in Order: Reading left to right, top row then bottom row: 4, 1, 3, 2.

TEACHING NOTES

- This is a common pond-frog pattern, not a rule for every frog species; some develop directly inside eggs.
- The froglet is a metamorph: hind legs develop before front legs, and the tail is absorbed rather than falling off.
- The four pictures simplify gradual changes. Stage lengths and diets vary, so no fixed timetable or universal tadpole diet is given.
