Name: _____

Amazon Rainforest Animal Coloring Pages / 06

Amazon Rainforest Animal Coloring Pages

A simple plan, answer key and trustworthy reading.

Suggested level: Ages 3-5 | Animal vocabulary and noticing shapes

GET READY

- Choose an animal and say its name together.
- Find the body feature in the prompt.
- Color freely and tell someone what you noticed.

SHEET-BY-SHEET NOTES

- 01 / Jaguar: Open-ended coloring. The coat patterns are called rosettes.
- 02 / Two-toed Sloth: Open-ended coloring. This is a Linnaeus's two-toed sloth.
- 03 / Capybara: Open-ended coloring. Capybaras often live near water.
- 04 / Brazilian Tapir: Open-ended coloring. Also called the lowland or Amazonian tapir.
- 05 / Scarlet Macaw: Open-ended coloring. Natural plumage includes red, yellow, and blue.
- 06 / White-throated Toucan: Open-ended coloring. This Amazon-region toucan has a pale throat.

TEACHING NOTES

- Find South America and the Amazon region on a map. These species use different forest layers, riversides, or nearby wetlands.
- This is an Amazon selection, not a mix of all tropical rainforests. The tapir is Brazilian, and the toucan is white-throated.
- The two-toed sloth has two claws on each front foot and three on each hind foot. Pictures simplify detail and are not to scale.
